

Business Aviation Data Encryption System

# Superior Protection for Air Connectivity

## Quantum-Proof Encryption For Your In-Flight Communications

**Altitude Does Not Equal Data Security** Your in-flight wireless communications, including emails, texts, VOIP calls and file transfers, can be easily intercepted by bad actors, giving them powerful leverage against you, your company and its shareholders.

**Protect Your Office in the Sky** Your data is already being stolen and stockpiled. Cybercriminals have for years been harvesting communications from targeted aircraft knowing that emerging quantum computer technology will soon allow them to unlock the secrets encrypted within those messages.

**The 7Tunnels Solution** 7Tunnels patented technology provides the strongest available encryption for your on-wing communications, protecting your valuable information today and into the post-quantum future. The 7Tunnels AG7 is a personal electronic device (PED) so it doesn't require a supplemental type certificate for onboard use. It easily connects to the existing onboard WiFi and provides a transparent user experience for passengers and flight crews.

# Don't bet your company and career on "good enough" encryption.

**Trusted by Fortune 50 Companies** 7Tunnels encryption has been vetted and tested in real-world situations onboard the aircraft of DuPont, one of the world's largest companies. After 12 months of proof-of-concept testing over hundreds of hours of international flight time, both DuPont and its spin-off, Corteva, now use 7Tunnels products to protect their on-wing communications.

**Simple and Fast** The AG7 is easy to use in flight: just pair a laptop, tablet or phone and that's it; there are no extra clicks or downloads required. Connect as many devices as you like.

**Total Support** 7Tunnels' on-site set-up and training gets your AG7 system operating immediately, and live phone assistance means you get your questions answered on your schedule.

**Cost Effective** The AG7 subscription provides unlimited data volume, so there's no need to manage your usage. Before the AG7's encryption key library is completely depleted through use, 7Tunnels ships a fully loaded replacement device, giving you uninterrupted security and peace of mind.

12-Month Subscription  
\$1,800/mo.

24-Month Subscription  
\$1,600/mo.
